Jen,

Figure 3 is done. I also updated the cross sections showing total VOC concentrations for compounds in the degradation pathways for TCA and PCE. Tom had previously added the PCE and TCE concentrations or just showed PCE concentrations and I had only shown PCE concentrations on the cross sections. We might want to take another quick look at the cross sections with the new concentrations and depths for the VPBs and MWs shown on them. Did you have anything you want to add to the comments column on Table 3? I can get that done tomorrow and emailed to you with Figure 3 and the new cross sections. I am also updating the costs for PDI 1 and 2. I should have those done tomorrow too.

Jean

Jeff and Jean – I just sent an invite for next Wednesday afternoon to brief Pete on the revisions to the work plan.

When do you think the revised Figure 3 and Table 3 will be ready? I think it will be easiest to have these two on hand for when we discuss with Pete.
